

Figurenotes Drum Kit Guide

Our standard stickers may be a bit small for most drum kits. You can use the print out provided to make your own symbols. Simply cut out each symbol and attach them to your drum kit using the diagram below.

Tips:

Instead of laminating, cover the symbol in cellotape to attach. This will keep it secure without altering the sound of the drum or symbol too much.

Try to attach each symbol at the top of each drum head. Aim for as far away as possible from where you would naturally hit the drum or cymbal.
