

Chord Flashcards

Use these flashcards to build chord progressions and recognition.

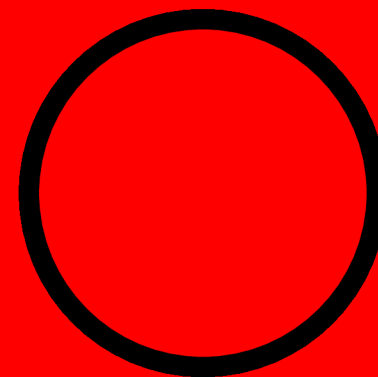

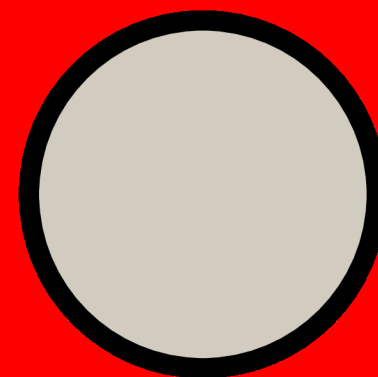

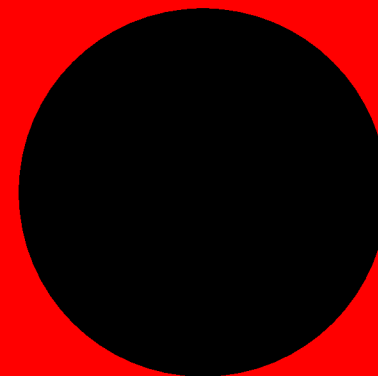

Each flashcard has the root colour as the background. This is what you see when using chords in Figurenotes. They also show all 3 notes in the chord. Look out for sharps and flats shown by arrows.

Print them out, or show them on a smartboard, to guide musicians through a chord progression. They are great for songwriting, accompanying a tune, or learning music theory.

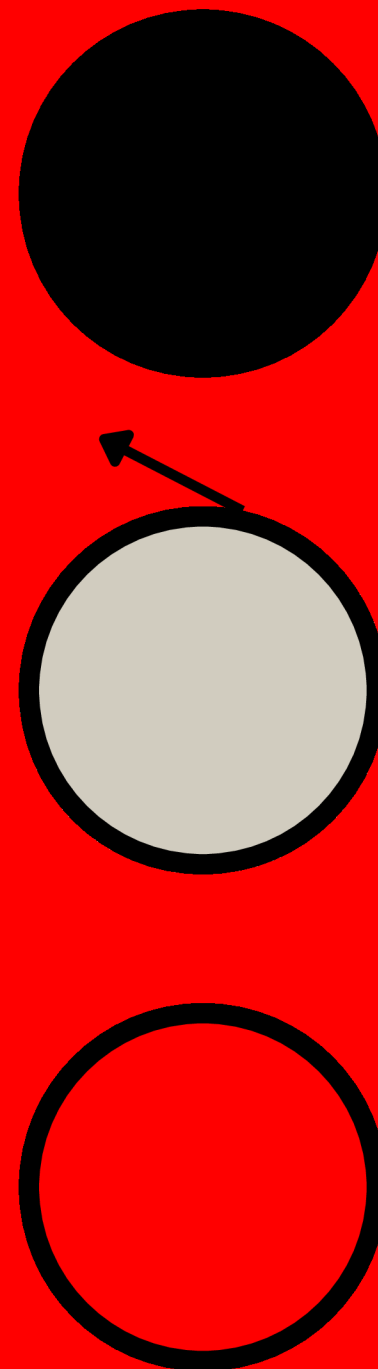

Improvisation - try improvising a tune using the colours shown for each chord.
