

Chord Flashcards

Use these flashcards to build chord progressions and recognition.

Each flashcard has the root colour as the background. Play this note. We then find a 'friend', not a 'neighbour' for our next note. Then repeat this process again. If there are sharps or flats within a chord, these are shown.

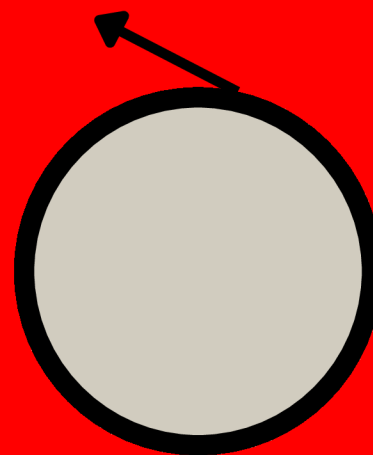

Print the flashcards, or show them on a smartboard, to guide musicians through a chord progression.

They are great for songwriting, accompanying a tune, or learning music theory.
